-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

Figures 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1,2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kazutaka (JP 03-030239).**

Re claim 1: Kazutaka discloses, in figure 2 and throughout the disclosure, a control grid, comprising:

- first bars (3) that are evenly spaced out on a skewed surface,
  - wherein the first bars extend substantially as a circle pseudo-involutes about a central hub.

Re claim 2: Kazutaka discloses, in figure 2 and throughout the disclosure, the first bars (3) are evenly spaced out about the central hub.

Re claim 6: Kazutaka discloses, in figure 2 and throughout the disclosure, the skewed surface is a surface of a sphere.

### ***Allowable Subject Matter***

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The best prior art discloses a control grid comprising many of the features of the claimed invention, including first bars extended substantially as a circle pseudo-involutes about a central hub. However, the prior art fails to teach or fairly suggest a control grid wherein the grid further comprises a second bar substantially concentric

with the central hub and fixed to the periphery of the first ring of first bars, as well as a second ring of first bars extending from the second bar, as claimed in claim 3. Claims 4-5 are allowable by virtue of their dependency.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US Patents 2,283,004, 2,617,959 and 5,936,335 disclose the state of the art.
